PROFILE

Data and systems analyst with experience across NSW government, higher education, and local government. Combines Power BI development, SQL, Python, and R with stakeholder engagement and data leadership. Professional work spans portfolio reporting and automation; academic and portfolio projects extend to time-series modelling, statistical analysis, customer behaviour, and digital performance.

CORE CAPABILITIES

Business intelligence	Power BI, Tableau, DAX, time intelligence, dynamic measures, paginated reports
Data & modelling	SQL, Python, R, SQL Server, Oracle, ETL, Power Query, statistical modelling
Microsoft solutions	Power Apps, Power Automate, SharePoint, Microsoft Forms, Power BI, Dataverse; familiar with Microsoft Fabric and Azure
Leadership & delivery	Stakeholder engagement, requirements analysis, training, mentoring, data governance; PRINCE2 training

PROFESSIONAL EXPERIENCE

System and Data Analyst

Department of Planning, Housing and Infrastructure | Jan 2023 - Present

- Take on data management and senior leadership responsibilities for multiple teams, supporting project, program, and portfolio reporting.
- Design Power BI dashboards and paginated reports covering project finance, timesheets, risks, issues, deliverables, and milestones.
- Translate stakeholder needs into data models, ETL processes, system specifications, and accessible reports; apply row-level security to protect team-specific information.
- Integrate SQL Server, SharePoint, and Dataverse data to validate user records and automate onboarding, de-onboarding, role changes, and status checks with Power Automate.
- Maintain scheduled data quality checks, investigate discrepancies across systems, and trace financial reporting errors to source calculations.
- Develop adoption and engagement reporting to support funding discussions; collaborate with senior management on user targets and assess project management tools against business requirements.
- Work with vendors to identify system improvements and deliver reporting solutions within agreed timeframes.

Experience, continued

Impact and Engagement Data Officer

University of New England | Jan 2022 - Jan 2023

- Developed interactive dashboards for research performance, ERA reporting, and benchmarking; gathered analytical requirements with cross-functional stakeholders.
- Used SQL in Oracle and Microsoft environments, and Python and R scripts, to extract, transform, validate, and integrate research information.
- Built R validation scripts to compare on-premise and cloud research records during migration, with dashboards tracking progress and recorded errors.
- Analysed ERA 2023 technical specifications to inform requirements for a bespoke institutional modelling tool and improved work processes in Oracle Apex.
- Created training documentation and mentored team members on Power BI and Research Services applications; covered Research Services system administration.
- Supported researchers with analytical solutions, including work to improve minority-class recall in animal classification.

ICT Business Support Analyst

Uralla Shire Council, NSW | Apr 2021 - Oct 2021

- Supported data remediation and cloud upgrades, working with stakeholders to align technical requirements with business goals.
- Coordinated testing and documentation of system changes, new functionality, and issue resolution.
- Contributed to communication strategies and system training to improve engagement with cloud-based solutions.

SELECTED ACADEMIC AND PORTFOLIO PROJECTS

Power BI reporting. Assessment and portfolio reports covering sales versus budget, customer purchasing patterns, and digital-channel performance. Features include dynamic measures, conversion rates, and revenue-to-forecast comparisons.

Rice growth-stage research (2021). Used R and generalised additive models to analyse satellite time series. Compared vegetation signals against recorded growth-stage dates and documented model limitations.

Statistical genetics. Explored marker-trait associations in sheep using linear models, multiple-testing thresholds, and diagnostic visualisations, distinguishing statistical significance from effect size.

EDUCATION

Master of Data Science | University of New England, Australia | 2020 - 2021

Bachelor of Engineering, Electrical and Electronics Engineering
Landmark University, Nigeria | 2013 - 2018

SELECTED PROFESSIONAL DEVELOPMENT

PRINCE2 training. Project management professional development.

Udemy (2022): Advanced DAX for Microsoft Power BI Desktop; Business Intelligence with Power Query & DAX; Power BI Desktop for Business Intelligence; Data Science Bootcamp.
